Data Science Services (Production ML) — Daniel Varela Perez

Focus

I build end-to-end ML systems ready for production: data prep, modeling, validation, deployment (API/batch), and monitoring. Specialties: fraud, credit risk, and forecasting.

Packages (fast entry + expansion)

1) ML Quickstart (2 weeks)

Best for: teams that need a useful model and an executive demo fast. **Includes:** - Data pipeline + baseline - Training and evaluation - Executive dashboard (Streamlit) - Metrics report + recommendations

2) Production Scoring API (3–4 weeks)

Best for: teams with a model but no deployment. **Includes:** - FastAPI scoring API - Batch scoring - Basic validation + initial monitoring - Technical docs + short runbook

3) Risk/Fraud Model Audit (1 week)

Best for: teams with models in use that need improvements. **Includes:** - Performance evaluation - Basic drift/stability analysis - Prioritized improvement plan

How we work

1. Quick diagnostic (30–45 min)
2. Scope and deliverables
3. Weekly checkpoints
4. Delivery + handoff (docs and next steps)

Pricing

- **USD 40/h**
- Short projects (1–3 weeks) and medium projects (1–2 months)

Availability

- Global remote
- Spanish native
- English for technical reading/writing; real-time call translation via AI Phone
